

# Handi<sup>®</sup>+ Scuba

- New and improved one-touch calibration button
- Overmold for extra protection
- One week calibration reminder
- Small, convenient and portable
- 24 month warranty
- Auto off

## The Handi<sup>®</sup>+ has been designed with you in mind:

The Handi+ is everything it's always been and more! Maxtec has improved the Handi O<sub>2</sub> analyzer to better meet your needs for nitrox analysis. The simple to use, one-touch calibration button, new overmold and calibration reminder combined with the traditional 2 year warranty, auto-off and size make it the best of its class. This analyzer is great for spot-checking directly from your tank via the Quick-Ox Adapter, or from your low flow inflater hose with the BC adapter.

### Specifications

Warranty:	24 months
Resolution:	0.1% Oxygen
Warm-up Time:	None
Operating Temperature:	150 C - 400 C
Display Range:	0.0-99.9% Oxygen
Weight:	Approx. 3 oz.
Response Time:	90% of final value < 15 seconds @ 250 C.
Accuracy and Linearity:	1% of full scale at constant temperature, R.H & pressure when calibrated at full scale ± 3% actual oxygen temperature range.

### Part Numbers
